Please find below and/or attached an Office communication concerning this application or proceeding.

	Application No.	Applicant(s)	
	10/034,425	SHAHEEN ET AL.	
Office Action Summary	Examiner	Art Unit	
	Thong H. Vu	2142	
The MAILING DATE of this communical Period for Reply	tion appears on the cover sheet w	ith the correspondence address	
A SHORTENED STATUTORY PERIOD FOR WHICHEVER IS LONGER, FROM THE MAII - Extensions of time may be available under the provisions of 3 after SIX (6) MONTHS from the mailing date of this communi - If NO period for reply is specified above, the maximum statute - Failure to reply within the set or extended period for reply will Any reply received by the Office later than three months after earned patent term adjustment. See 37 CFR 1.704(b).	LING DATE OF THIS COMMUNI OF CFR 1.136(a). In no event, however, may a cation. Ory period will apply and will expire SIX (6) MON, by statute, cause the application to become Al	CATION. reply be timely filed ITHS from the mailing date of this communication. BANDONED (35 U.S.C. § 133).	
Status			
1)⊠ Responsive to communication(s) filed of	on <u>30 Decem</u> ber 2005.		
	☐ This action is non-final.		
3) Since this application is in condition for	allowance except for formal mat	ers, prosecution as to the merits is	
closed in accordance with the practice	under Ex parte Quayle, 1935 C.D). 11, 453 O.G. 213.	
Disposition of Claims			
4)⊠ Claim(s) 1-16 is/are pending in the app	lication.		
4a) Of the above claim(s) is/are	withdrawn from consideration.		
5) Claim(s) is/are allowed.			
6)⊠ Claim(s) <u>1-16</u> is/are rejected.			
7) Claim(s)is/are objected to.			
8) Claim(s) are subject to restriction	n and/or election requirement.		
Application Papers			
9) The specification is objected to by the E	Examiner.		
10) The drawing(s) filed on is/are: a) accepted or b) objected to	by the Examiner.	
Applicant may not request that any objection	n to the drawing(s) be held in abeya	nce. See 37 CFR 1.85(a).	
Replacement drawing sheet(s) including the	e correction is required if the drawing	(s) is objected to. See 37 CFR 1.121(d)	
11) The oath or declaration is objected to be	y the Examiner. Note the attache	d Office Action or form PTO-152.	
Priority under 35 U.S.C. § 119			
12) Acknowledgment is made of a claim for a) All b) Some * c) None of:	foreign priority under 35 U.S.C. §	119(a)-(d) or (f).	
1. Certified copies of the priority do	cuments have been received.		
2. Certified copies of the priority do	cuments have been received in A	pplication No	
3. Copies of the certified copies of	the priority documents have been	received in this National Stage	
application from the Internationa	, , , , , ,		
* See the attached detailed Office action for	or a list of the certified copies not	received.	
Attachment(s)			
1) Notice of References Cited (PTO-892)		Summary (PTO-413)	
 2) Notice of Draftsperson's Patent Drawing Review (PTO 3) Information Disclosure Statement(s) (PTO-1449 or PT 		s)/Mail Date nformal Patent Application (PTO-152)	
Paper No(s)/Mail Date	6) Other:		

Application/Control Number: 10/034,425 Page 2

Art Unit: 2142

1. Claims 1-16 are pending.

Response to Arguments

2. Applicant's arguments filed 12/30/05 have been fully considered but they are not persuasive.

Applicant argues the prior art does not clearly detail the GGSN acts as RSVP proxy (Response filed 6/10/05 pages 16-17).

Examiner points out the GGSN acts as translator, a filter or a gateway including RSVP proxy as an alternative choice such as a specific proxy application for RSVP. However, in case the applicant insisted of the clear evidence of GGSN acts as RSVP proxy, Examine will be pleased to provide the prior art in the following rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Widegren et al [Widegren, 6,621,793 B2] in view of Williams et al [Williams 2002/0133600 A1].

3. As per claim 1, Widegren discloses A method for assigning responsibility for resource reservation protocol (RSVP) signaling in order to support multimedia communications between a user equipment (UE) in a wireless communication network and a user of an external network, the

Application/Control Number: 10/034,425

Art Unit: 2142

wireless network having both the UE and a general packet radio service gateway support node (GGSN) capable of supporting RSVP signaling, the method comprising:

providing a policy control function (PCF) capable of assigning RSVP signaling to either the GGSN or UE [Widegren, GGSN, RSVP, a policy control function PCF, col 13 line 17-col 14 line 16];

the PCF assigning RSVP signaling to the GGSN or UE [Widegren, assigns user data unit, col 6 lines 4-10];

if the PCF assigns RSVP signaling to the GGSN [Widegren, the session establishment in the case of RSVP, the proxy server supplied information to the PCF, col 14 lines 10-16];

the PCF signaling the GGSN assignment to the GGSN [Widegren, RSVP sends information to GGSN, col 14 lines 1-9; col 13 line 52-col 14 line 59];

the PCF signaling the UE **not** to perform RSVP signaling [Widegren, PCF signaling to UE not authorized, col 14 lines 48-59]; and

in response to receiving the GGSN assignment, the GGSN performing RSVP signaling [Widegren, GGSN signaling such as RSVP, col 14 lines 5-16]; and

if the PCF assigns RSVP signaling to the UE:

the PCF signaling the GGSN **not** to perform RSVP signaling [Widegren, PCF signaling to UE, col 17 lines 30-45; GGSN reject establishment, col 14 lines 10-17];

the PCF signaling the UE assignment to the GGSN [Widegren, GGSN receives information, the session establishment in the case of RSVP, the proxy server supplied information to the PCF, col 14 lines 10-16];

Art Unit: 2142

in response to receiving the UE assignment, the UE performing RSVP signaling [Widegren, RSVP signaling, Fig 5, col 3 line 64-col 4 line 10].

However Widegren does not explicitly detail the GGSN function as RSVP proxy;

In the same endeavor, Williams discloses a method and apparatus for establishing a protocol proxy for a mobile host terminal and a protocol enabled router in a multimedia session such as the UE-A request that the GGSN function as its RSVP proxy, [Williams 0051-0058](see Fodor reference, 0176, as an alternative of GGSN emulates an RSVP proxy)

Therefore it would have been obvious to an ordinary skill in the art at the time the invention was made to incorporate the GGSN function as its RSVP proxy as taught by Williams into the Widegren's apparatus in order to take advantage of the proxy function. Doing so would provide a guarantee service in a wireless environment.

- 4. As per claims 5,11 contain the similar limitations set forth in claim 1. Therefore claims 5,11 are rejected for the same rationale set forth in claim 1.
- 5. As per claim 2, Widegren-Williams disclose the PCF delegates the RSVP signaling assignment to the GGSN [Widegren, RSVP signaling, Fig 5, col 3 line 64-col 4 line 10].
- 6. As per claim 3, Widegren-Williams disclose the GGSN bases the delegated RSVP signaling assignment in response to local traffic conditions [Widegren, GGSN receives information, the session establishment in the case of RSVP, the proxy server supplied information to the PCF, col 14 lines 10-16].

Application/Control Number: 10/034,425

Art Unit: 2142

7. As per claim 4, Widegren-Williams disclose the GGSN bases the delegated RSVP signaling assignment to a local policy of the GGSN [Widegren, GGSN receives information, the session establishment in the case of RSVP, the proxy server supplied information to the PCF, col 14 lines 10-16].

Page 5

- 8. As per claim 6, Widegren-Williams disclose the GGSN bases the RSVP signaling assignment in response to local traffic conditions [Widegren, GGSN receives information, the session establishment in the case of RSVP, the proxy server supplied information to the PCF, col 14 lines 10-16].
- 9. As per claim 7, Widegren-Williams disclose the GGSN bases the RSVP signaling assignment in response to a local policy of the GGSN [Widegren, GGSN receives information, the session establishment in the case of RSVP, the proxy server supplied information to the PCF, col 14 lines 10-16].
- 10. As per claim 8, Widegren-Williams disclose the GGSN bases the RSVP signaling assignment on a negotiation between the GGSN and UE [Widegren, negotiated, col 7 lines 19-44].
- 11. As per claim 9, Widegren-Williams disclose in response to the GGSN receiving a message indicating the GGSN should perform RSVP signaling from the UE, the GGSN makes

Application/Control Number: 10/034,425 Page 6

Art Unit: 2142

the RSVP signaling assignment [Widegren, GGSN receives information, the session establishment in the case of RSVP, the proxy server supplied information to the PCF, col 14 lines 10-16].

- 12. As per claim 10, Widegren-Williams disclose if the GGSN assumes the RSVP signaling an acknowledgment is Williamst to the UE and if the GGSN assigns the RSVP signaling to the UE a negative acknowledgment is Williamst to the UE [Widegren, acknowledgment, col 18 lines 59-67; col 22 lines 18-25].
- 13. As per claim 12, Widegren-Williams disclose if the GGSN receiving the second message indicating declining, the GGSN deciding who performs RSVP signaling [Widegren, GGSN receives information, the session establishment in the case of RSVP, the proxy server supplied information to the PCF, col 14 lines 10-16].
- 14. As per claim 13, Widegren-Williams disclose if the GGSN receiving the second message indicating an acceptance, the GGSN performing RSVP signaling [Widegren, GGSN receives information, the session establishment in the case of RSVP, the proxy server supplied information to the PCF, col 14 lines 10-16].
- 15. As per claim 14, Widegren-Williams disclose the UE is the one and the GGSN is the other, the method further comprising in response to receiving the first message the GGSN determining who performs the RSVP signaling [Widegran, local policy, col 15 lines 30-42; col

Page 7

Art Unit: 2142

17 lines 54-64].

16. As per claim 15, Widegren-Williams disclose the GGSN determining the RSVP signaling performing based on the local traffic conditions [Widegran, local policy, col 15 lines 30-42; col 17 lines 54-64].

As per claim 16, Widegren-Williams disclose the GGSN determining the RSVP signaling performing based on a local policy of the GGSN [Widegran, local policy, col 15 lines 30-42; col 17 lines 54-64].

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner *Thong Vu*, whose telephone number is (571)-272-3904. The examiner can normally be reached on Monday-Thursday from 6:00AM- 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, *Andrew Caldwell*, can be reached at (571) 272-3868. The fax number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval IPAIRI system. Status information for published applications may be obtained from either Private PMR or Public PMR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
